

Donate to the PSA Foundation

As the end of 2019 approaches, please keep in mind that there are several programs available to support the Poultry Science Association Foundation. Donations can be made online [here](#). Among them are:

- **PSA General Fund: Charting Our Course – Securing Future Leadership for Poultry:** This is the overall capital fundraising campaign of the PSA Foundation. Donations to this program fund miscellaneous programs not sponsored by corporate donors.
- **Aviagen North America Continuing Education Endowment:** These funds support poultry science students interested in attending graduate school for their MS, PhD or DVM degrees. The endowment is renewable for a second year.
- **Dr. Robert N. Brewer Memorial Scholarship:** This endowed fund provides scholarships to a junior or senior in the Department of Poultry Science at Auburn University.
- **Ceva Endowed Graduate Fellowship:** Provides funding for three years for students pursuing a PhD with a focus on poultry health.
- **Cobb-Vantress Graduate Fellowship:** Provides funding for two years for students pursuing their MS degree or three years for PhD students. Preference is given to students interested in the sciences necessary to support advancements in genetics in poultry science.
- **Dr. James H. and Shirley H. Denton Memorial Scholarships (Texas A&M or Arkansas):** Family and friends of Dr. James H. Denton and the late Shirley H. Denton established an endowed scholarship. Funds can be donated for scholarships to support students at either the University of Arkansas or Texas A&M University.
- **Diamond V Endowed Undergraduate Scholarships:** Enables the poultry science enterprise to compete with other disciplines for the most gifted students. Students are not required to major in poultry science, but must focus on poultry science. Scholarships are awarded to incoming juniors for up to four semesters.
- **Dr. Fred A. Gardner Tribute Scholarship:** This endowed fund provides scholarships to a junior or senior in the Department of Poultry Science at Texas A&M University.
- **Andrew F. Giesen III Undergraduate Internships:** Identifies talented undergraduate students with an interest in science and places them in summer internships with partner institutions for the purpose of encouraging them to consider graduate school opportunities for their MS, PhD or DVM degree.
- **Merck Animal Health Graduate Fellowships:** Provides funding for three years for students pursuing a PhD in innovative, applied, and basic aspects of poultry science, including such areas as intestinal health, immunology, poultry pathology and disease, molecular biology, and vaccine technology and development.
- **Arthur W. Perdue Graduate Fellowships:** Provides funding for two years for students pursuing a MS degree with projects focused on better defining normal broiler chicken behavior and/or the changes in behavior associated with enriched environments in the broiler house.

The PSA Foundation appreciates your support. For more information on any of these initiatives, please contact Dr. James H. Denton, PSA Foundation Executive Director, at james.denton@poultryscience.org.
